

PRICING PLAYBOOK

# The Packaging Order Of Operations

Four decisions, in order. Skip one and your pricing meetings go in circles.

01 / 06

STEP ONE

# Packaging

What's in the box? Decide what you're selling before you decide how to sell it. Good/Better/Best, modules, tiers — this is the architecture.

STEP TWO

# Pricing Structure

Subscription? Usage? Hybrid? Outcome-based? The structure decides how your customer experiences cost over time.

STEP THREE

# Pricing Metric

What you price ON. Seats, API calls, GB processed, agents deployed. Pick the metric that scales with the value your buyer feels.

STEP FOUR

# The Number

Now — and only now — you set the price point. The number is the easy part once the first three are locked.

THE PAYOFF

# Skip a step. Pay later.

Most teams jump straight to the number and reverse-engineer the rest. That's why pricing feels broken. Run the sequence.
