

PRICING ROLLOUT

Start at the end. Sequence backwards.

The order you roll out new pricing matters as much as the pricing itself.

STEP 01

Design with insiders first

Pull your CS and product leads into the room. Pressure-test the model before any customer sees it.

STEP 02

Validate with sales leadership

Get your CRO and frontline leaders behind it. If they can't sell it internally, they won't sell it externally.

STEP 03

Test on new business in your smallest region

Lowest stakes, fastest feedback. You learn the objections without exposing real revenue.

STEP 04

Migrate your second tier next

Customers 2, 3, 4, and 5. Build the migration muscle before the one that matters most.

STEP 05

Then, and only then, your top account.

By the time you get there, you have months of evidence and a tested motion. That's how you protect the customer you can't afford to lose.
