

PACKAGING VALIDATION

The Jobs-To-Be-Done Test

A one-question check that tells you if your packaging actually works — before you ship it.

Swipe →

01 / 06

STEP 01

Lay out the three tiers

Put your full packaging in front of a real customer. Label the jobs-to-be-done on each tier so nothing is hidden.

STEP 02

Ask one question

Which tier describes the job you are trying to get done?
Stay quiet. Let them point.

READING THE RESULT

What the answer tells you

Points immediately

packaging works

Hedges between two tiers

boundaries are blurry

Says “a little of both”

packaging failed

Asks clarifying questions

jobs are not legible

THE BAR

If they cannot pick one **without hesitation**, the packaging is not done.

LeanScale Labs — pricing and packaging workstream

RUN THE TEST

Validate before you launch

Most packaging fails in front of customers, not in the spreadsheet. Pull three customers this week and run the test.
